considerable stock has been sold the bille in a company known as the Surprise acid Mining Company, and they will be iterested in the disclosures made at a recent setting of; stockholders, which had been illed by President T. D. Thomas and other sections for the nurseas of statements. directors for the purpose of voting to levy an assessment of one cent a share. The acceptablers defeated the proposition be-

shaft which is being sunk on the No. 8 claim.

The ore is identical in appearance with that of the First Thought mine, which is southeast of the McKinley. There is two feet of this gold quartz taken in a porphyry-ledge 30 feet wide. This porphyrtic rock has a spotted gold content, with fine particles of pyrite-dissemisted uniformly through it.

The recent find made by E. M. Cammon and associates at Dry gulch, atout three miles east of Oroville, in the Okanogan, gave returns of 2.3 per cent, copper, seven onness silver, \$1.80 gold, a total of about \$10.80 to the ton. For a good many years rich float ore has been found in Dry gulch, but no one has ever discovered a ledge until two weeks ago.

residency President J. D. Thomas and other acceptable of the proposition between the proposition betwe

with the stock on margins in the belief that it would speedily go to 3x a share. When her options commenced to fall due the brokers called on them to discharge their options commenced to fall due the brokers called on them to discharge their options commenced to fall due the brokers called on them to discharge their obligations and they were unable to do so, darge beddings on a weak market. Some were dumped on the market in one day, and the San Pedro Copper Company, two and the San Pedro Copper Company and the San Pedro Copper

the Bingham district is now approaching 12,000 tons a day.

David Keith, president of the Silver King Coalition, is to be at the head of a new mining exchange to be launched shortly as a rival of the exchange now in operation. The new organization is to be known as the Utah Stock and Mining Exchange and is being promoted by C. W. Hartley. The other members of the board of governors are David Evans, B. F. Grant, Ezra Thompson, Windsor V. Rice, James D. Murdock and F. J. Westcott of Salt Lake City; John P. Creer and Payson and Joseph Berry of Provo.

COLORADO SPRINGS, April 21.—The Miller

COLORADO.

COLORADO SPRINGS, April 21.—The Miller lease on shaft 3 of the Gold Sovereign Company on Bull Hill, Cripple Creek, is in a promising ore shoot at 300 feet depth. The territory north of the main shaft is virgin. Assays show 6 to 8 ounces gold to the ton. centrator. The shaft will be a three compartment affair. Crosscuits will be rule into the old workings from the 500 foot and lower levels. The Alta is probably and lower levels. The Alta is probably for placer a shaft was bedrocked on too for placer as haft was bedrocked on the force in t

racing one copper and three lead furnaces. Another furnace will be blown in in a short time, as the ore is accumulating rapidly.

M. J. O'Brien of Cobalt, Canada, is at the head of a syndicate which is arranging to install a 500 horse-power electric plant on the Moris River in the Rayon district, Chihuahua. The Rayon district is rich in minerals and the proposed hydro-electric plant will furnish cheap power.

José v Limantour, Government Minister of Finance, in a message to Congress reviews the mining situation of Mexico as follows:

The Executive deeply regrets that it is unable to cooperate in other ways toward sustaining the mining industry, which is seriously menaced by the depreciation of silver. It has, indeed, facilitated the acquisition of cheap fuel by initiating legislation permitting the free importation of crude oil to certain mining concerns which, giving employment to thousands of worknen, would otherwise ere this have suspended operations or would have been on the eve of suspending them. It has also postponed the approval of certain modifications in freight rates for which the railway companies, with considerable justice, have been applying, but which might have wrought some hardship to the mining interest. But the Executive realizes that these and other measures which aim at benefiting that interest will not afford any appreciable compensation to the majority of mining concerns for the heavy losses arising from the extreme depreciation of metals not found in combination with gold. Perhaps copper and lead will continue to improve slowly but steadily thanks to the revival of the industries which require large quantities of these metals, but the future of silver is at the present time so uncertain that it would be idle to attempt any forecast as to its course during the coming fiscal year.

GOOD PIG MARKET.

Orders Liberal and Prospect Fair-Orders in Structural Steel Too. PITTSBURG, April 25 .- A better feeling prevails in the pig iron market than has any time within the last four months. Steel

manufacturers made inquiries for more manufacturers made inquiries for more than 50,000 tons of basic iron and several good orders have been placed for foundry iron. The Westinghouse Electric and Manu-facturing Company has contracted for 10,000 tons of Nos. 1, 2 and 3 foundry for its Cleve land plant for delivery during the next six months. The General Electric Company is in the market for 11,000 tons of foundry iron for its Schenectady plant. The Massillon Iron and Steel Company, a cast iron pipe concern, has purchased 24,000 tons of Nos. 2, 3 and 4 grades of foundry iron. New England buyers have inquired for

so,000 tons of pig iron, Chicago buyers have inquiries out for 10,000 tons and fully as much more is being bid on in Cincinnati.

Prices are very low, however, but almost for eastern Texas, partly cloudy to day; warmer to northest portion: showers at allebt or to the coast. any kind of buying will stiffen the price. Southern No. 2 is ranging between \$10.50 to \$11.50 per ton, with an upward tendency. A Canton (Ill.) concern bought 3,900 tons of malleable bessemer from Ironton, Ohio,

at \$14 at furnace. Structural steel contracts were numerous during the week and several of large tonnages. The Curtiss Building of Philadel-phia has been let, but the steel supply has not been placed. This will consume 14,000 tons. The contract for the Indianapolis

TO THE

GOVERNÓRS

NEW YORK STOCK EXCHANGE

Is it proper or decent that the facilities of your in-stitution should be employed to deceive and defraud the unwary? They were so employed in

St. Lawrence & Adirondack,
 International Power,
 American Ice Securities.

(2) International Power,

(3) American Ice Securities.

They are being so employed at the present time in Columbus & Hocking Coal & Iron, which stock is cornered, and which by sheer, flagrant and outrageous manipulation is made to sell 10 points higher than United States Steel common. Do you know what asset, if any, the company has greater than that of having its stock listed on the New York Stock Exchange? The thing has become so notorious that many reputable brokers will not receive orders in the stock, and yet you permit it to be quoted in a manner which will be eventually the undoing of the public, who are misled by your quotations. In the other three cases cited you waited until it was too late to save the innocent, and scandal resulted. What will you do in Columbus & Hocking Coal & Iron? Besides being Governors, you are also brokers. Would you receive orders in this stock or allow your customers to buy it? Is your duty to the public as Governors of the New York Stock Exchange any less than your duty to your personal clients as brokers?

The Columbus & Hocking Coal & Iron Company has \$7,000.000 common stock, \$500,000 preferred stock and \$1,266,000 bonds. Its report for the year 1907-8 showed:

For \$7,000,000 common stock.... \$47,187 To the casual reader of this advertisement: Do not under any consideration sell Columbus & Hocking Coal & Iron short. The pool that has cornered the stock, having carried the price from 22 in February to 62% on Saturday last, would have you absolutely at its mercy.
